

For: Backend Development Intern

CERTIFICATE OF INTERNSHIP COMPLETION

This is to certify that **Navneet Shahi** has successfully completed their internship as a **Backend Development Intern** at **Healthletic Lifestyle** under the guidance of the **Head of Department (HOD)** and **Team Lead** during the period from **10/04/2025 to 10/07/2025**.

Summary of Responsibilities:

Throughout their internship, **Navneet Shahi** was involved in a variety of key backend development tasks, demonstrating both technical proficiency and a strong willingness to learn. Their main responsibilities included:

- **Backend Coding & Development:** Contributing to the development of backend features for our web applications using technologies such as **Node.js**, **Python**, and **Java**.
- **Database Management:** Assisting in the design, maintenance, and optimization of relational databases (e.g., **MySQL**, **PostgreSQL**) and NoSQL databases (e.g., **MongoDB**).
- **API Development & Integration:** Working on building and maintaining RESTful APIs to integrate backend services with frontend interfaces.
- **Version Control:** Using **Git** for code versioning and collaborating with the development team on **GitHub** to ensure code quality and smooth deployment pipelines.
- **Testing & Debugging:** Writing and executing unit tests, debugging code, and ensuring the robustness and performance of the backend infrastructure.

Skills Acquired: During the internship, **Navneet Shahi** honed essential skills in:

- **Programming & Scripting Languages** (Node.js, Python, Java).
- **Database Design and Data Modeling**.
- **API Integration & Development** using RESTful principles.
- **Problem-solving** through debugging and testing.
- Proficient in **version control systems** (Git) and **collaborative software development** practices.

As part of their time at Healthletic Lifestyle, **Navneet Shahi** demonstrated a keen interest in improving efficiency across all workflows. One of their key suggestions was for implementing **Applicant Tracking System (ATS)** features to streamline future internship recruitment processes. In this regard, we recommend:

- **Integration of coding challenge platforms with ATS** to assess technical skills more effectively during the recruitment process.
- **Automated resume parsing** within the ATS to filter candidates based on key backend development skills (such as proficiency in programming languages, experience with databases, and API development).
- Enhanced **candidate ranking systems** within ATS, using **skill-based filters** to prioritize candidates with relevant experience and expertise for technical internships.

Navneet Shahi has shown outstanding technical aptitude, a proactive attitude, and the ability to work effectively within our team. We are confident that they will be a valuable asset to any organization moving forward and strongly recommend them for any future opportunities in backend development.

We wish **Navneet Shahi** all the best in their future career endeavors.

Sincerely,

For Healthletic Lifestyle

Rajeshwar Puram
